### National Sponsors

### NSW Branch Sponsors

The Transport Management Centre (TMC) monitors and manages the New South Wales road network 24 hours a day. It aims to ensure the 180,000km network operates with maximum efficiency, including during peak commuter travel times, special events and following unplanned incidents such as vehicle accidents. In other words, the TMC is the traffic operational centre of excellence for the RTA.

The TMC uses advanced monitoring, communication and traffic flow systems. These systems aim to make journey times more consistent, respond to and clear traffic incidents as fast as possible and with quality, up-to-date information, help road users choose the best routes, travel times, and modes of travel.

This will be a very interesting evening and not one to be missed. So come and see TMC live actual flow of traffic on NSW roads.

Essential RSVP to Gemma Herrera on 0417485884 or email [Gemma\\_Herrera@rta.nsw.gov.au](mailto:Gemma_Herrera@rta.nsw.gov.au) by Tuesday, 9<sup>th</sup> September as limited place for only 20 people are allowed.

**All members and non-members are welcome**  
**RSVP by 9th September 2008**
