**AUSTRALIAN INSTITUTE  
OF TRAFFIC PLANNING  
AND MANAGEMENT  
INCORPORATED**

**Friday,  
30th October 2009  
Parramatta Leagues Club  
Wentworth Room**

## **2009 AITPM NSW Technical Seminar**

### **Traffic planning and management**

are integrated activities involving traffic engineering, land-use planning, social science, economics and environmental issues associated with the safe and efficient movement of people and goods.

### **The Australian Institute of Traffic Planning and Management**

is an association of people practising in these fields, and the 2009 NSW Technical Seminar will provide an excellent opportunity for AITPM members, traffic engineers, transport and land use planners and elected representatives to:

- Increase their knowledge
- Exchange ideas and research in this field and
- Develop professional networks.

This is the fifth instalment of the Back to Basics Technical Seminars, which will be held in the geographic heart of Sydney. These seminars provide an excellent opportunity to our members to enhance their skills in traffic engineering and transport planning and to keep up to date with the latest technologies and guidelines. This year you will get to hear about the impact of transport accessibility in Sydney's outer suburbs, as well as a different way of thinking about parking provision. There have also been important releases of new guidelines. We have organised speakers who will introduce us to "tools of the trade" and "design issues" which no practitioner should miss. We encourage you to participate in this year's technical seminar.

The National AITPM Committee is also working towards assisting the delivery of educational programmes through our network of members around Australia. Look out for a number of initiatives offering opportunities for targeted training in NSW over the next couple of years.

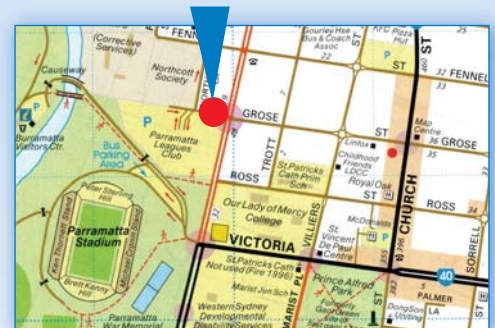

### **All Seminar Inquiries to Convenor:**

**Tom van Drempt**  
ph: +61 2 9272 1415  
email: tvandrempt@pb.com.au  
or

**Roshan Aryal**  
ph: 02 97250260
