

PARKING – DESIGN AND INNOVATIONS

SEMINAR

National Sponsors

Date: Thursday 21st May 2009
Time: 17:00 for 17:30 start; 19:00 finish
Light refreshments and pizza will be provided at 17:00

Venue: Leichhardt Town Hall Supper Room, 1st floor, cnr Norton Street & Marion Street, Leichhardt

Cost: This seminar is free of charge.

Car parking provision and design have always been of great interest to many traffic and transport practitioners. New developments in this area occur often, which is why the NSW Branch of the Australian Institute of Traffic Planning and Management regularly organises seminars on this topic. The following aspects of car parking design and innovations will be presented.

Speaker: **Greg Briscoe-Hough**, Senior Consultant, Luxmoore Parking, ARRB Group

Topic: **Parking - A Public Private Partnership in Transport Planning: More spaces or better management?**

Greg will address some recent planning and management issues in parking, including:

- parking costs and how we all pay for them,
- assessing the need for parking provision,
- shifting planning policies beyond supplying more parking to managing parking in response to actual and prioritised needs,
- the role of technology in regulating traffic and parking and in planning outcomes.

NSW Branch Sponsors

Speaker: **Andrew Hulse**, Senior Associate, Arup Transport Planning
Topic: **Sustainable Car Parking – an oxymoron or a possibility**

There are many instances where car parking leads to sustainable travel choices or contributes to an improved social outcome. Andrew will explore sustainable initiatives in car park design and provision, including:

- energy and climate change,
- materials and waste,
- water,
- biodiversity and heritage,
- pollution control,
- community amenity and benefit.

Speaker: **Oleg Sannikov**, Director, TEF Consulting
Topic: **Use of microsimulation modelling for parking design**

Oleg will speak about the application of microsimulation modelling for detailed design of:

- access controls and queuing areas,
- pick-up and drop-off zones,
- operation of signalised single lane two-way driveways,
- circulation arrangements in multi-level car parks.

Proudly offered by AITPM as part of our program of seminars and workshops for practitioners

This seminar attracts professional development points
