Traffic Safety – the Challenge for Traffic Engineers

AITPM NSW Technical Seminar

Date: Wednesday 30 April 2008
Time: 12:30 registration; 1:00 pm start; 4:00 pm finish.
Venue: Cabravale Leisure Centre,
Broomfield Street, Cabramatta
(refer to map overleaf)

Cost: There is no charge for attendance at this seminar.
Snacks, tea and coffee will be provided

Traffic engineers are responsible for ensuring that traffic is managed from both safety and efficiency perspectives. They have prime responsibility for dealing with safety aspects of the road and traffic environment rather than with vehicle safety or broad road user behaviour issues. Traffic management practice should reflect safety strategies and best practice at national, state and local levels. This seminar seeks to provide a window on the challenges for practitioners in addressing these issues, from several different perspectives.
