Darlington Transport Study

Wednesday 9th February 2011, 5.30pm – 7.00pm
DTEI Seminar Room, 77 Grenfell Street Adelaide

AITPM SA Branch invites you to join us for a presentation on the Darlington Transport Study

The Darlington Transport Study is a major multidisciplinary investigation into future transport options and land use arrangements. In establishing a long-term vision for the study area, it addresses future requirements through to 2031 for all modes of transport – road, rail, bus, cycling and walking – and their potential to activate urban regeneration.

The study includes developing a plan for the future upgrading of South Road, in particular the South Road/Sturt Road intersection and the South Road/Flinders Drive intersection, including consideration of adjacent intersections such as Ayliffes Road and the Southern Expressway. It will include possible grade separation of intersections, a new transport interchange with park’n’ride facility and investigations into extending the Tonsley rail line into Flinders University.

The Darlington Transport Study is scheduled for completion in early 2011.

An integral part of the Darlington Transport Study is the consideration of the connectivity between South Road and the adjacent intersections, including the Southern Expressway. The duplication of the Southern Expressway, announced by Premier Mike Rann on 17 February 2010, will complement the findings of the Darlington Transport Study.

GUEST SPEAKER

Denise Hatzi Project Director – Department for Transport Energy and Infrastructure

There is no charge to attend this forum. Light refreshments will be provided beforehand.

RSVP to Ly.Ing@aecom.com by 5pm Friday 4th February 2011
